

Empathy Map

Project Title: Rising Waters

Introduction

An Empathy Map helps understand the needs and expectations of users. The primary users of **Rising Waters** are people living in flood-prone areas and disaster management authorities.

User Perspective

Says

- I need early flood warnings.
- I want accurate predictions.

Thinks

- Will my area be flooded?
- Can I trust the prediction?

Does

- Checks weather updates.
- Takes safety measures during heavy rainfall.

Feels

- Worried about floods.
- Feels safer with early alerts.

User Needs

- Accurate predictions.
- Easy-to-use application.
- Quick alerts.
- Reliable information.

Conclusion

The **Rising Waters** system is designed to provide timely and accurate flood predictions, helping users make better decisions and improve disaster preparedness.
